TENNESSEE COLONY, TX. 75861
903-928-2841**

March 9, 2017

This is a reminder that if you have any kind of backflow prevention device (such as on a sprinkler system), the Texas Commission on Environmental Quality (TCEQ) requires you to get an annual cross-connection and backflow-prevention assembly test and maintenance report done and submitted to BCY Water Supply Corporation for us to keep on file with our records. Examples of companies in this area that are licensed to do this testing include Petty's in Tyler, American Waterboys, Inc. in Tyler, Thomas Plumbing in Palestine, and Backflow Prevention Services in Athens. Please have this testing done and send the report or a copy of the report to BCY WSC as soon as possible. Also, if you have a well connected to your meter, you must have a RPZ backflow device, and it must be tested upon installation, and then annually.

If you have any questions, please contact the office.

Thank you,

BCY Board of Directors
